ENJOY SMART AND COMFORTABLE LIFE

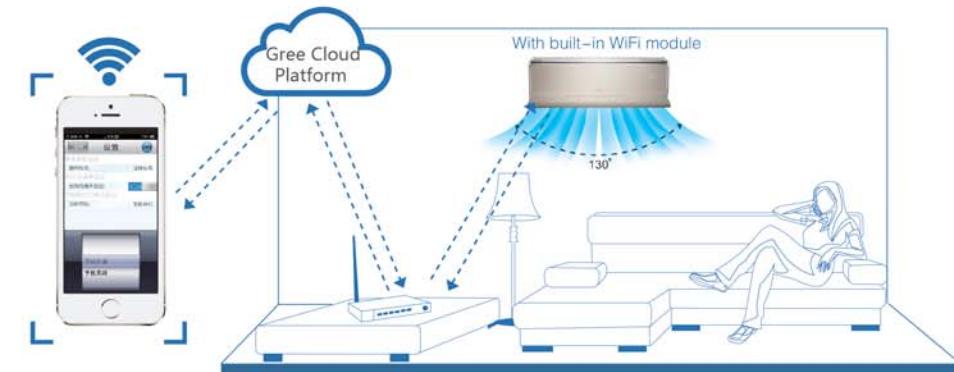

New Generation WiFi Control *

When installing Gree special APP "G-Life" on Smart Terminal, and setting short distance mode or long distance mode, you can remotely control the air conditioner.

Short distance mode:

Smart Terminal can connect to the air conditioner directly for remote control, no need wireless Router, which is applicable for home short distance control.

Long distance mode:

Users bind air conditioner, wireless Router and Gree Cloud Platform together. When the Smart Terminal is connected to internet, log on Gree Cloud Platform can remotely control the air conditioner at home, which is applicable for long distance control.

Special instruction:

1. When binding on any Smart Terminal is succeeded, user can log on Gree Cloud Platform directly to control the air conditioner through any Smart Terminal installed with "G-Life".
2. In the home, user can select wireless Router as the WiFi for controlling the air conditioner.

Remark: Smart Terminal indicates smart phone, tablet PC (only for iOS and Android operation system, please refer to the application software for the support version).

How to download the application software for Smart Terminal - "G-Life":

iOS and Android system can download "G-Life" by the following three methods.

Method 1: Turn on APP Store, search "G-Life" and then download it.

Method 2: Enter Gree Cloud Platform and then click "G-Life" to download it.

Method 3: Log in <http://www.gree.com.cn/>, click "service center-customer service-download center", and then find out "G-Life" to download it.

Method 4: Scan above two-dimension code and then download APP "G-Life".

You can set regional air swing, SAVE navigation, DIY sleep curve, weekly timer and other functions through APP "G-Life". The comfortable life is controlled by yourself freely.

iOS

Both iOS and
Android system
can
download this APP

Regional Air Swing

When setting "room layout" by smart phone, the built-in WiFi module inside the air conditioner will intelligently set the air swing region according to the customized movement region set by user, which can control the swing angle precisely for realizing the best PWV.

SAVE Navigation

The system intelligently analyse temperature and fan speed set by user, and it will automatically adjust frequency and fan speed. The system will enter SE mode under the premise that the comfort is guaranteed.

DIY Noise

Adjust the operation of air conditioner through setting the noise value. Just turn on "noise setting of indoor unit" mode and then you can select the noise value freely. The system will adjust the required value intelligently.

DIY Sleep Curve

It can satisfy the sleeping requirement from various users. Just touch the screen slightly and then you can DIY your sleep curve.

Weekly Timer

Set the weekly timer through mobile device. Air conditioner will be turned on or turned off automatically every day. From then on, you don't need to worry that you will forget to turn off the air conditioner.

"Turbo" Cooling

Press "Turbo" button on remote controller to enjoy a larger air flow, which enables the indoor temperature to reach the set temp in a shorter time.

4-way Air Outlet

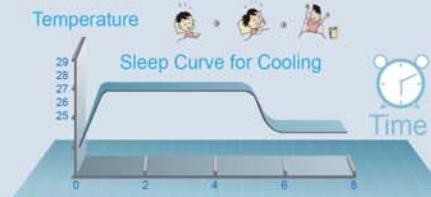

The louver can be vertically or horizontally adjusted so as to maximize comfort in the room.

7 Fan Speeds

From super low to turbo, choose desired air flow.

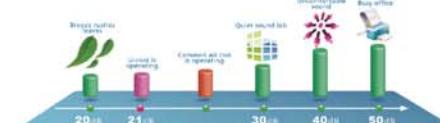

3 Sleep Curves

3 Sleep Curves

- Mode 1: Indoor temperature automatically rises (when cooling) or drops (when heating).
- Mode 2: Featuring unique refreshment function, the temperature is automatically adjusted to be a little lower before you wake up.
- Mode 3: You could design your own sleep curve under DIY mode.

Low Noise

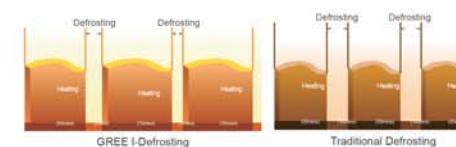

Noise lowers to 18dB, making you feel like staying on the Moon.

Temperature

Intelligent Defrosting

Maximize warm comfort with shorter defrosting time.

Traditional defrosting works by setting time. E.g. defrosting process is on for 10 mins for every 50mins.

Gree I-Defrosting is only performed when needed, which reduces energy waste by eliminating the unnecessary defrosting process.

Functions for Low Ambient Temperature

8°C Heating

Maintain the room temperature steadily at 8°C and prevent the room from freezing by heating operation when nobody is at home for long in severe winter.

-15°C Cooling

Cooling at -15°C while keep a reliable operation. As the outdoor temperature changes, the frequency of compressor and the speed of fan adjusts accordingly.

-22°C Heating

Operate finely when heating at -20°C. It is supported by GREE's electrical heating chassis, preheating technology and frequency-adjusting compressor.

Cold Air Prevention

The copper pipe will be heated in advance, so the air will not be blown out before it reaches the set temperature.

- FAN** Choose fan speed.
- MODE** Change operation mode: Auto, Cool, Dry, Fan, and Heat.
- Decrease set temperature; hold the button for 2 seconds to decrease set temperature rapidly.
- +** Raise set temperature; hold the button for 2 seconds to raise set temperature rapidly.
- TURBO** For rapid cooling or heating.
- CLOCK** Press this button to set horizontal swing angle.
- QUIET** Set vertical swing angle.
- SLEEP** Set present time or display timer.
- TIMER OFF** For turning off timer.
- TEMP** Show set indoor/outdoor temperature.
- IFEEL** Start the ventilation system or generate cold plasma.
- X-FAN** Operation of the unit will be adjusted according to temperature sensed by remote to maximize your comfort.
- QUIET** Air conditioner will run according to the preset sleep temperature curve.
- LIGHT** Choose auto quiet mode.
- SLEEP** Turn on/off the light on the unit.
- X-FAN** Start/stop indoor fan which is used for drying the components.

I Feel

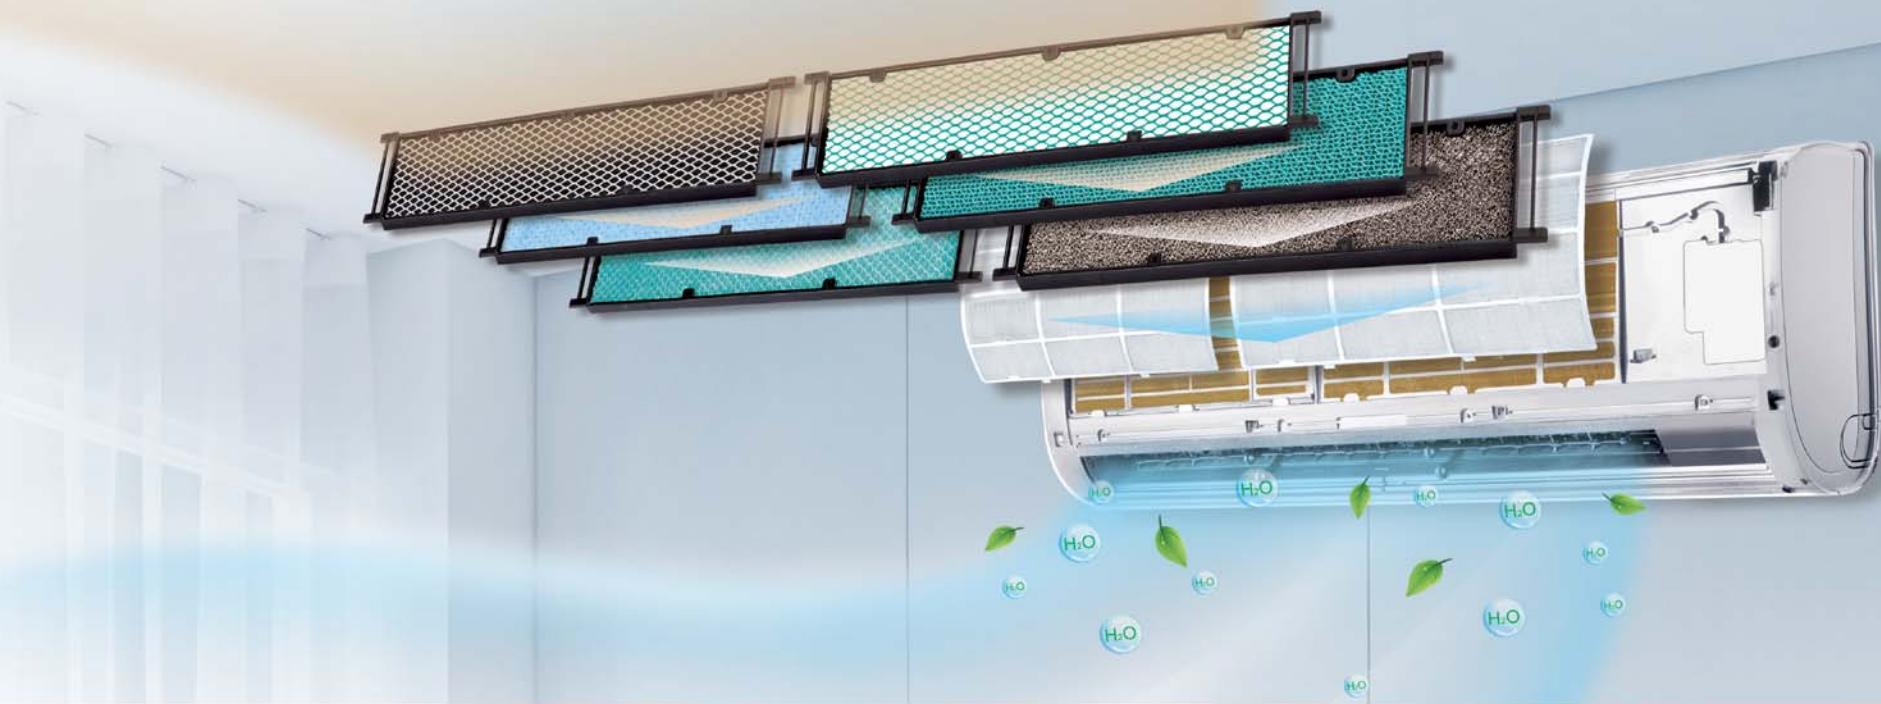

The mini sensor in the remote controller can sense its surrounding temperature, and transmit the signal back to the indoor unit. So the unit can adjust the air flow volume and temperature accordingly so as to provide maximum comfort.

Remote with I Feel

Remote without I Feel

Photocatalytic Filter

This filter is able to completely oxidize and degrade organic contaminants. It can effectively eliminate **99.9%** of bacteria, viruses and unpleasant smell.

Catechin Filter

Catechin is extracted from green tea. It can effectively eliminate **95%** of carcinogenic agents, such as staphylococcus, streptococcus, salmonella, etc.

Active Carbon Filter

Activated carbon can effectively adsorb smoke, pet odors, and other unpleasant odors.

Silver Ion Filter

Silver ion is able to sterilize **99%** of bacteria by suppressing proliferation of mold and bacteria and preventing the causes of unpleasant odors.

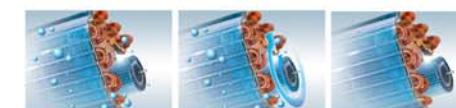

Multi-function Filter

Combine **3** filters from **6** different types including acaro bacterium filter, silver ion filter, catechin filter, chitin filter, formaldehyde beater filter and vitamin C filter to meet your various needs simultaneously.

Auto Clean [X-FAN]

Cross fan continues blowing to dry inside of indoor unit after switching off the unit so as to keep clean and healthy.

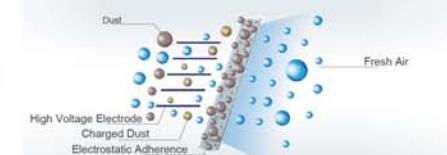

Cold Plasma

Effective sterilization with more than **90%** of bacteria killed
Odor removal
Air nutrition improvement with more negative oxygen ions

Electrostatic Dedusting Generator

By making use of the principle of electrostatic adherence, it can effectively absorb the dust from the air. With detachable design, it is easy for complete cleaning to ensure the quality air.

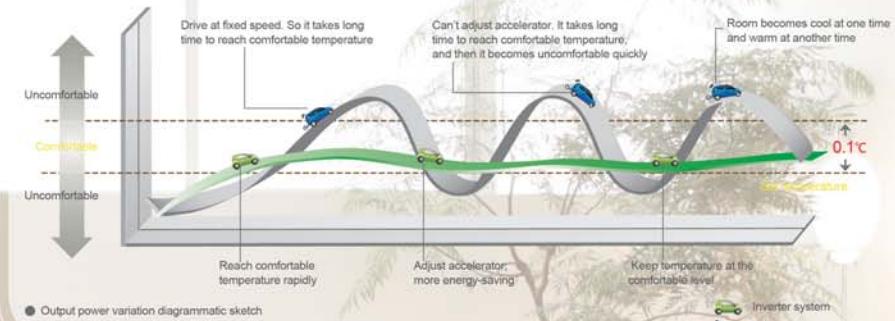

* Notes:Applicable to some selected models

R410A

INVERTER

How Inverter Saves Energy

● Output power variation diagrammatic sketch

G¹⁰ Inverter

Ultra low frequency torque control

- Constant temperature
- Energy saving

Environment-friendly R410A refrigerant

Automatic voltage adaptation (150-260V)

- Low-carbon design
- High efficiency

- More stability
- Less damage

High-speed DSP chip

- Accurate calculation
- Efficient operation

Ultra-low noise control

High reliability

- Quiet
- Comfortable

- Excellent quality
- Superior performance

Wide frequency precise control

- Unceasing operation
- Accurate control

Computer simulation control

UHF flux-weakening control

- Less fluctuation
- Lower noise

- Rapid cooling
- Rapid heating

Power factor correction technology

- High efficiency
- Better protection

Faster Cooling

Precise Temp Control

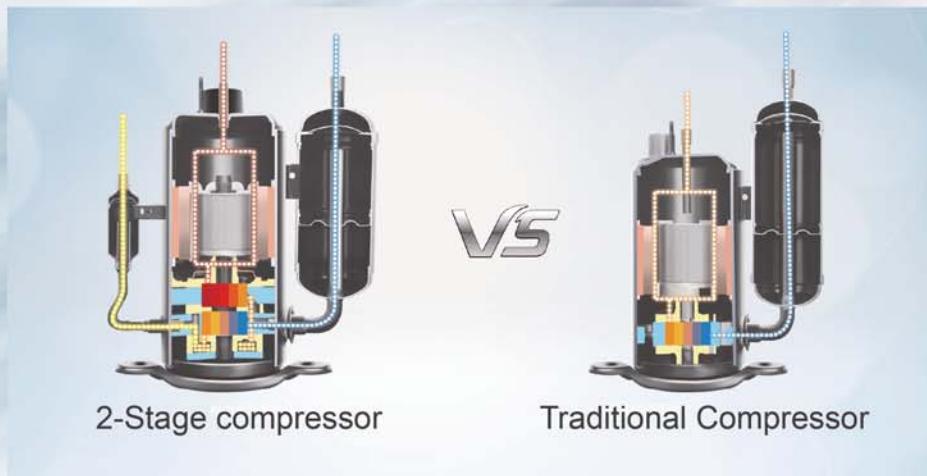

Energy Saving

Eco-friendly Refrigerant

2-Stage compressor

2-Stage compressor

Traditional Compressor

Key Points for Reaching High Efficiency

Refrigeration System

High efficiency and stable running compressor

High efficiency and larger heat exchanger with optimized piping system

High-efficiency electronic expansion valve (EEV) controls refrigerant flow precisely

Air Flow System

Enlarged air intake and outlet

Optimized cross fan design with larger air volume and enhanced heat exchange efficiency

Optimized axial fan design with larger diameter to increase air volume and enhance heat exchange efficiency

Control System

Cutting-edge chip for precise inverter control

Integrated Evaporator
Compact design minimizes IDU size but enhances heat exchange greatly.

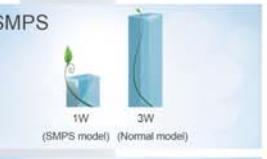

Integrated Design
Integrated rear base and water tray design avoid water leakage and reduce noise.

Fire-proof electric box
Electric box sealed by metal casing could prevent fire in case of short-circuit.

170V Low Voltage Start Up
The unit could operate from 170V to 265V, which is suitable for unstable power supply areas.

SMPS

1W (SMPS model) 3W (Normal model)

85V~265V (SMPS model) 180V~260V (Normal model)

Better PCB protection between 85V~265V.

Anti-corrosion ODU
Rust-free for installation and operation in the salty climate.

Golden/Blue Fin
It can improve the heating efficiency by accelerating the defrosting process, and also be resistant to the salty air, rain and other corrosive elements.

Dual Side Installation
Left or right side water outlet, easy for installation.

Auto Restart
When the power is off and then on, the unit automatically restores the previous function setting.

Self-diagnosis
Once abnormal operation or parts failure happen, the unit will shut off automatically to protect the system. Meanwhile it will indicate protection or error code for fast service.

High Temp Resistance PCB
In the inverter outdoor unit, the PCB could work well even when temp is up to 85°C, and also metal casing is fire-proof.

Improved Base Pan Design
Condensing water will flow easily and not be frozen on the base pan. It also improves heating efficiency during low temp operation.

Characteristics of Possible Next-Generation Refrigerants (for Residential and Light Commercial Air Conditioners)

		Environmental Performance		Safety		Economic Performance	
		ODP	GWP*	Flammability	Toxicity	Equipment cost	Efficiency
Refrigerants currently used in developing countries	R22(HCFC)	0.055	1,810	★	★	★	★
Refrigerants currently used in industrialized countries	R410A(HFC)	0	2,090	★	★	★	★
Possible next-generation refrigerants	R1234yf(HFO)	0	4	◆	★	◆	※
	R32(HFC)	0	675	◆	★	★	★

INVERTER

Human-body induction

Air conditioner can detect the human position and movement area in the room to adjust the operation status, such as air supply direction, air volume, operation frequency of compressor and so on, for keeping the room temperature as even as possible. You can select human around air supply or human movement area air supply. What's more, this function can also be turned off according to your preference.

Wired controller

Wired controller is the optional part, which is an extra. If you need the wired controller, please ask the installation personnel to connect it when installing the air conditioner. However, the normal operation won't be affected if the wire controller is not connected.

Features: ● Standard ● Optional

Lomo Series

0.5w Standby

Innovative switcher power design ensures only 0.5w standby and wider voltage of PCB between 85v-265v.

Intelligent Auto Restart

Upon power is resumed after power failure, the units in the whole building will not be restarted at the same time to avoid impact of electricity net(suitable for engineering project).

Wide Ambient Operation Range

From -30°C to 54°C Ultra low ambient heating with 2-stage compressor.

Operation sketch map of 2-Stage compressor:

Blue:
Low-pressure suction

Purple:
Medium-pressure inflation

Red:
High-pressure discharge

Three-dimensional Fan Blow

110cm vertical air outlet with big circulating air volume and wide air outlet angle.

Provide more comfortable cooling and heating enjoyment.

Humanized Cold Air Prevention

Low ambient temperature heating of Gree I-Crown series

Low ambient temperature heating of conventional air con

5 kinds of Fan Speed

Designed with 5 kinds of fan mode

Low Noise

Noise as low as 26dB(A)

Koobe Series

Portable Type

Compact Design

With 300 mm body design, it is designed for more flexibility and space saving.

Self-diagnosis

The unit shows error code automatically when it does not work well, for easier maintenance.

Air Purifier

HEPA High Efficiency Dedusting Filter

Eliminate 99.97% of dust and almost 100% of cigarette.

HIMOP Odor-free Filter

Focus on absorption of formaldehyde and other hazardous odor.

Anions Generating Function

1,200,000-1,400,000 anions per cubic centimeter are generated under turbo mode.

Features: ● Standard ● Optional

	YT1F(XFAN)									
	YAG1FB									
	YB1F2 (XFAN)									
Wired controller	XX19									
Centralized controller	CE50-24/E									

Note:

● means standard, ○ means optional.

* If Long-distance monitoring software Gree Eude mon 2009 is selected, the communication module ME30-00/E2 shall be selected also. The quantity of the module shall be confirm according to the quantity of outdoor units.

Light Commercial

U-Match

Inverter Series

It is a kind of split system that the outdoor unit can be freely connected to different types of indoor units according to various indoor decoration requirements.

- Built-in drain pump
- High efficiency
- Intelligent defrosting
- Anti-cold function
- Comprehensive protection
- Compact design
- Easier maintainability

- Double ambient temperature sensor design makes a precision temperature monitoring.
- Low start-up current thanks to power delay control design.
- Higher efficiency thanks to sine wave DC inverter compressor control.
- High reliability and easy maintenance thanks to one piece integrated PCB board.
- Stable cooling/heating under -15°C outdoor environment temperature (for the unit CUHD*C1O).

Indoor Unit

Duct type	Cassette type	Floor ceiling type
<ul style="list-style-type: none"> ● Drain pump fitted as optional with increased lift of 1100mm. ● Fresh air inlet and air valve control function improve the indoor air quality. ● Flexible air in/outlet and condensing water outlet direction according to different installation requirements. ● Optimized air duct design improves the performance and lower the noise. 	<ul style="list-style-type: none"> ● Drain pump fitted as standard with increased lift of 1100mm. ● Special low noise fan design. ● Different swing angle design for cooling and heating mode for better comfort. 	<ul style="list-style-type: none"> ● 3-D air flue design. ● Easy replacement of motor and fan blade thanks to clamp block propeller design. ● Different swing angle design for cooling and heating mode for better comfort.

Item	Nominal operating condition (temperature)				Operation range (temperature)
